

Dreams - A closer look into our minds

October 27th - 28th, 2022

GI School

The mind, the engine behind one's self. Thanks to the mind, we are able to observe, comprehend and participate in our realities--essentially--to be part of everyday life. However, underneath these realities hides a precious element, something almost imperceptible, that ultimately ends up dictating the persona and ideas of each artist. **Dreams** are the only element we possess that allow us to alter reality to our pleasure. "The world of dreams and imagination is made up of deception and misrepresentation of reality". This can portray a partial reality by allowing it to be altered, shifted, rearranged and deconstructed. It ultimately reflects our aspirations as artists, our passions, our thoughts, and our interests. Dreams are the most authentic form of expressing the inner self of each artist, and art is the purest form of expressing these realities.

The VII annual Arts Fest in 2022, **Dreams - A closer look into our minds** is focused on highlighting and incentivizing dreams. We invite you to manifest yourselves through artistic expressions like music, theater, dance, philosophical and literary presentations, visual arts, poetry, and photography, among others. We believe that we can not put barriers around our thoughts given that each artist's vision is in constant development and growth. It is because of this that we want to incentivize artists to find themselves through art, which is the only tool that allows imagination and dreams to be expressed. Our mind is our limit, now it is up to you to exploit this potential, or keep dreaming.
